

Figure 1 consists of 12 bar charts arranged in a grid. Each chart shows the percentage of total protein in various fractions (A, B, C, D, E, F, G, H, I, J, K, L) for different protein types (A, B, C, D, E, F, G, H, I, J, K, L) across different conditions (1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12). The charts are arranged in a grid, with each chart having its own legend and y-axis scale. The x-axis for all charts represents the fraction number (A-L). The y-axis represents the percentage of total protein. The legend for each chart indicates the protein type and the condition. The y-axis scale varies by chart, with some having a maximum of 100% and others having a maximum of 200%.
